

A name you can trust for all your Telecommunications Solutions

Switch Port Leasing Services

On a variety of hardware platforms

DigiTalk – NACT – Phoenix Soft

Information on KIT Communications; Switch Port Leasing Services:

At KIT we offer a variety of switching platforms for you to port lease. The reason for this is simple, not every switch does everything you want. We match the switch to your needs and port lease to you the switch that is most suitable to your requirements.

KIT is carrier neutral; this allows you to bring your own carriers into the switching platform at no additional charge. At the same time, if you need carriers we can recommend carriers that are already connected up to our port lease switches allowing for quick turn up.

Here are some of the benefits you will receive when port leasing your switching equipment from KIT.

-  Great way to lower costly equipment overhead.
 -  Allows you to benefit from state-of-the-art technologies without the large upfront investment.
 -  Will give you quality, experienced technical & operational support.
 -  As technology changes you do not have to re-invest in equipment upgrades.
 -  Your costs fluctuate as your call volume or revenues fluctuate.
-

Let's talk about how you can take advantage of our decades of Telecom experience
